

Governor Andrew Cuomo
State Capitol
Albany, NY 12224

March 15, 2016

Dear Governor Cuomo,

As lake property owners around Seneca Lake, we are gravely concerned about Crestwood Midstream's plan to store liquefied gas in the old salt caverns along the lake.

Crestwood's interest, as a corporation, is naturally in maximizing its profits for its stockholders. It will not set aside sufficient funds to cover the environmental nightmare that will ensue if the salt caverns leak or fail. In addition, Crestwood has agreed to hold harmless the State and Schuyler County. In essence, the risk is passed along to us and other taxpayers in the region.

This is a gamble we are not willing to take. If the caverns leak or fail, we stand to lose our property value. What are the chances that will happen? The most recent independent risk assessment gave it a 40% chance over the next 25 years.

Even if no accident or leak occurs, we all own lake property for the peace and natural solitude that it provides. We have all experienced the way sound travels over still waters, and know that we can hear people or dogs barking from miles away on a still summer night. Imagine how that peace will be impacted when a six-track rail depot carries trains around the lake, with horns blowing and metal screeching on metal.

We marvel at the stars unimpeded by light pollution, which will be changed by industrial lighting and active burning flare stacks.

We travel the rural roads without fear of trucks carrying explosive propane.

Most of us have water intakes that go directly into the lake, and we do not need to worry that storing gas in those caverns could cause a spike in the lake's already high salinity level.

An Independent Hydro Geologist report indicates that re-pressurizing the caverns to store gas could cause that spike, and this could be devastating to the regional economy.

The following appeared in the November 29, 2015 Finger Lakes Times:

"Another huge factor to consider with lake contamination is the real property tax base. As an example, Seneca County alone has a full market value (based on 2014 average sale) of over \$600 million. In the town of Varick, the lakefront real estate constitutes over 80 percent of the taxable real estate assessment there. All of the lakefront towns in the Finger Lakes contain billions of dollars of assessed value generating millions of dollars of tax revenues supporting schools, fire departments, infrastructure and governments. With water contamination, the assessments of waterfront properties would fall drastically because of decrease in demand resulting in property values dropping

precipitously. Who will provide the majority of local support for schools, government and infrastructure then?" - MEL RUSSO, Owner, Senecayuga Properties, Inc.

As a collective, we lake property owners are a substantial economic entity. Our tax revenues alone provide stability to the counties and communities that line the lake.

Many of us have histories on Seneca Lake that span generations, and we would like our children to have the opportunity to build the same memories on the lake as those have before us. If this massive industrialization takes place, the reasons we all love Seneca Lake will be forever negatively impacted.

No individual or company should be allowed to be in a position that threatens to undermine the economic stability of the region. That is just not good government.

We join together now and ask that you deny permits to Crestwood and preserve the rich natural, cultural and historic resources that make Seneca Lake so vital to all of us.

Respectfully Submitted,
